

Profile

Software Developer focused on making business systems more reliable, connected and easier to work with. I solve backend, CRM and integration problems where business data must move correctly between legacy systems, modern applications and external platforms. My value is reducing failure points, manual friction and unclear technical processes.

Experience

Freelance Software Developer

03/2026 - present

Web & Backend Projects

- Turned unclear business needs into clear technical scopes and working solutions
- Improved external credibility through professional client- and sponsor-facing web presences
- Delivered practical systems clients could manage and extend after handover

Software Developer

07/2025 - 03/2026

Aagon GmbH | Soest

- Stabilized CRM data flows by tracing integration failures
- Connected product data to CRM operations through a REST interface
- Reduced release risk with tests, docs and structured debugging

Software Developer

02/2025 - 07/2025

Opti-Net Systeme GmbH | Münster

- Protected daily operations while modernizing Delphi/PHP integrations
- Fixed data exchange between ANSI storage and UTF-8 web systems
- Cut recurring interface errors around endpoints, encoding and handovers

Apprenticeship as IT Specialist for Application Development

10/2022 - 01/2025

Mintellity GmbH | Münster

- Turned client requirements into maintainable web and backend features
- Made HubSpot exports usable through import and validation workflows
- Supported Laravel-based client projects with API testing, documentation, and Docker-based development workflows
- Delivered the IHK final examination project

Internship Web Development

08/2022

Mintellity GmbH | Münster

- Website development with HTML, CSS, Bootstrap, JavaScript, Vue.js, and jQuery

State-Certified Special Needs Care Worker

03/2017 - 03/2022

Caritasverband für den Kreis Coesfeld e.V. | Wohnheim Ascheberg

- Educational group service at Caritas Coesfeld

Education & Qualifications

IT Specialist for Application Development

- Chamber of Commerce (IHK) graduation
- Graduation in January 2025
- Vocational college grade 1,7

State-Certified Special Needs Care Worker

- Vocational college training EspA Münster
- Graduation in October 2016
- Final grade 2.3

Core Skills

Business Problems • System integration • Legacy modernisation • CRM data flows • API reliability • Data import and validation	Technologies Used • PHP 8 / Laravel • Node.js • SQL • REST/SOAP • Git / Docker	Data and Systems • HubSpot • Creatio CRM • OpenAPI / Swagger • JSON / XML / CSV • MySQL / SQLite
Web Delivery • Responsive interfaces • CMS and shop setups • Content structure • Frontend cleanup	Languages • German: native • English: fluent	Working Methods • Testing • Documentation • Technical scoping • AI-assisted ◦ Research ◦ Review

Selected Project References

Client/project details anonymised where required

Robotoid University of Belgrade Robotics Team Website robotoid.stt.org.rs 04/2026 Lead Developer Technical Project Coordination JavaScript Tailwind CSS • Led the technical development of a trilingual website for a university robotics competition team • Took ownership of development, scoping, technical planning, and delivery coordination • Planned and led English-language meetings to align requirements, content, and roadmap
FSRA University of Belgrade Formula Student Website fsra.stt.org.rs 06/2026 - WIP Lead Developer WordPress Plugins Polylang • Modernising an existing WordPress site by improving frontend structure and multilingual content handling • Adding multilingual support with Polylang • Follow-up project after Robotoid delivery
Röstbursche E-Commerce Web Project roestbursche.de Technical Project Coordination WordPress WooCommerce Elementor • Built a company website for a café, including an integrated WooCommerce shop • Coordinated technical implementation, site structure, and content requirements
IHK Final Project GitHub PHP Laravel Livewire Composer Spatie Kanban Project Management • Developed a reusable Composer package for asynchronous comments in Laravel projects • Implemented polymorphic storage logic for flexible integration across different models • Planned and managed the project using Kanban-based workflows
Modernisation of a legacy SOAP API to REST PHP SQL REST SOAP Regular expressions • Modernised an existing PHP 5.x SOAP API into a REST API under PHP 8.3 • Built data exchange between Delphi 5, an ANSI database, and a UTF-8 PHP webshop • Implemented regex-based endpoint processing and coordinated technical details with third-party providers
HubSpot Data Processing PHP Laravel SQL REST Saloon Livewire Spatie • Imported, processed, and structured large HubSpot data sets for a CMS project • Designed data flow logic, database structures, and status handling • Implemented MVP data imports for customer testing with real production data • Added unit tests with PEST to improve reliability and maintainability
